WORKSURFACES

- Four material choices: high performance thermally fused laminate, high pressure laminate, veneer and solid surface.
- **Thermally fused laminate** tops are 1" thick overall with a 45 lb. density particle board core and feature 2mm thick edgeband. Edgeband finish can be specified to match or contrast the surface finish.
- **High pressure laminate** tops are 1 $^{1}/_{16}$" thick with 2mm flat edge or 1 $^{3}/_{16}$" thick with knife edge. 1 $^{1}/_{16}$" thick tops have a 45 lb. density particle board core and the 2mm flat edge finish can be specified to match or complement the top surface. 1 $^{3}/_{16}$" thick tops have an MDF core and the knife edge finish will match top surface. Models ending in (**LK**) indicate high pressure laminate with knife edge.
- **Veneer** tops are 1 $^{3}/_{16}$" thick overall with choice of edge detail - flat edge or knife edge. Edge finish will correspond to surface finish. When flat edge, core material is 45 lb. density particle board; when knife edge, core material is MDF. Models ending in (**V**) indicate veneer.
- **Solid surface** tops are 1 $^{1}/_{4}$" thick overall with choice of edge detail - flat edge or knife edge. Solid surface material is 0.5" thick with built up edge profile over a particle board or plywood subtop depending on overall top size. Models ending in (**SF**) indicate solid surface with flat edge; models ending in (**SK**) indicate solid surface with knife edge.
- Please see model # for pricing and availability of various material and edge options.
- Refer to page 326 or globalfurnituregroup.com for available finish options.
- While not all sizes are available in all materials:
  - Worksurfaces of 96" or less in length are standard in one piece (1 carton).
  - Worksurfaces 120" to 144" in length are standard in two pieces (2 cartons).
  - Worksurfaces 96", 120" and 144" x 48" include support channels.

BASES

- **Caution**: to meet BIFMA standards for performance and stability, appropriate base size must be specified with corresponding top sizes identified. **Top plates and base plates vary by base size and will only work with table shape sizes as referenced on the following pages**.
- Bases are constructed of a round or square solid steel metal plate for counter balance, covered with a finished steel shroud, affixed with four bolts to a cold rolled steel tube.
- GRB14H25 attaches to tops with a 6" x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GSB13H25 and GSOB13H25 attach to tops with a 6"x 6" steel plate, welded to a 1.5" diameter steel tube, bolted to a 0.5" thick solid steel counter balance. Not to be used on tops greater than 22" x 22" in size.
- GRB22H15, GRB22H21, GRB22H26, GRB22, GRB22H35, GRB22H41, GSB19H15, GSB19H21, GSB19H26, GSB19, GSB19H35 and GSB19H41 attach to tops with a 6"x 6" steel plate, welded to a 3" diameter steel tube, bolted to a 0.5" thick solid steel counter balance.
- Top plate and base plate of GRB22 and GSB19 models in all heights, have pass-through cut-outs to accomodate a single port simplex or dual USB module to deliver power or USB charging to the surface. This allows the module to be mounted directly above the base and to pass the unit's cord through the base column resulting in the cord and plug head exiting from the bottom of the base for plugging into a floor or wall mount power source.
- GRB28, GRB34, GSB23 and GSB28 attach to tops with an 11" x 11" steel plate, welded to a 4" diameter steel tube, bolted to a 0.375" thick solid steel counter balance.
- Bases are available PAINTED in "Sandtex" finish for extra durability. Also available in plated finishes (see page 326) at an upcharge and with an extended lead time. Please see model # for pricing.
- All bases come with six height adjustable glides with 0.75" of adjustability.
- Round bases available in 22", 28" and 34" dia.
- Square bases available in 18.5", 22.5" and 28.5".
